

Seal Coat Supply

Proudly Offers

TUFF COAT

Simply the BEST pavement sealer you can get!

ADVANTAGES & BENEFITS

- Increased Durability
- Increased Adhesion to Underlying Surface
- More Scuff Resistant
- Superior UV Resistance
- Faster Cure Rate than standard sealcoats
- Earlier Striping and Traffic Release
- Nighttime Applications are Possible where freezing or rain is not imminent
- Increased Flexibility
- Unsurpassed Moisture Resistance
- No PAH Threat to Environment
- Non DOT regulated
- Environmentally Safe
- Non-Carcinogenic

USES

- High traffic flow roadways
- Low traffic roadway areas
- HOA's
- Trailer Parks
- Shoulders of Roads
- Areas subject to scuffing such as Cul-de-sac, storage areas, areas with forklift use.
- Parking lots can now be seal coated with little or no tenant interruption or inconvenience due to a fast curing rate

PRODUCT APPLICATION

- TUFFCOAT may be applied with a hand or motorized squeegee, or sprayed.
- Area to be sealed **must** be free of dust, dirt, and debris. All oil spots or other infirm areas must be treated or removed prior to application.
- Can be diluted with clean, potable water. Max dilution is 20%. Do not over dilute the product as this will decrease overall product performance. Cure time will be faster with less dilution.
- For best results, use of "water-borne" paint is recommended when striping sealcoated roadways or parking lots.

If Tuff Coat can stand up to the abuse on the turns at St. Johns race track, imagine how it will perform on your pavement!

TUFF COAT

Seal Coat Supply, a leader in asphalt sealer manufacturing and development since 1989, has produced TUFFCOAT; a mineral reinforced, water-borne, black, bituminous asphalt sealer designed to seal any pavement application. TUFFCOAT is an extremely durable, flexible, long wearing, anti-skid, water impermeable surface, ready for full traffic in just a few hours. TUFFCOAT has been formulated to have the best adhesion and earliest cohesion of any seal coat on the market. No fibrous fillers are added to this product, resulting in only mineral solid residuals and a faster setting more durable product with no possibility of bacterial growth.

As a result of this formulation, when TUFFCOAT is properly applied and cured, it forms a tough, weather, wear and UV resistant surface with the most tenacious bonding to the underlying asphalt you can get. The result is a beautiful, deep black, protected pavement.

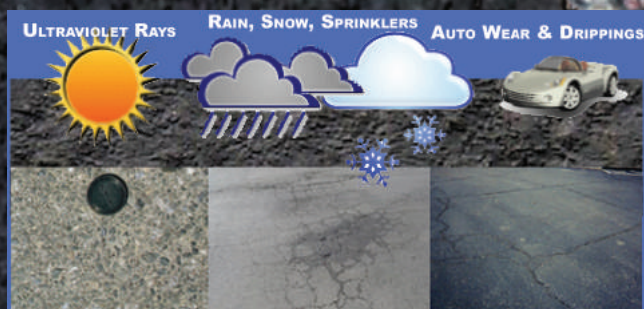

QUALITY

TUFFCOAT is rigorously tested in our onsite labs before shipping to assure quality and consistency. These are priorities to us because we know that *"Your customer is our customer."* We manufacture our own asphalt emulsions to control and achieve a higher overall product quality and consistency.

ASPHALT PAVEMENT PROTECTION YOU CAN DEPEND ON

Add Life and Value to your Pavement

TUFFCOAT protects pavement from the deteriorating effects of weather UV and traffic wear.

- ◆ Sun
- ◆ Oil
- ◆ Seeping or pooling water
- ◆ Traffic
- ◆ Ice, snow, salt

These factors constantly wear away at asphalt pavement.

Even the best quality asphalt needs protection!

Seal Coat Supply works with quality contractors to ensure that you have the best product possible on your asphalt pavement. Contact your quality contractor today and ask for TUFF COAT..

Sealing your way into the future.
